ORD 3309-66

17 August 1966

MEMORANDUM FOR: Director of Research and Development

SUBJECT: Change in SPS Allotments

1. This morning in talking to [] he mentioned that PPB and Col. White have limited our SPS's to six. This is the quantity that was reported to have been mentioned last February during discussions concerning our ability to recruit this type of person. This allotment refers to our FY'67 figure and does not mean that we cannot increase the SPS quantity to nine in FY'68 if necessary.

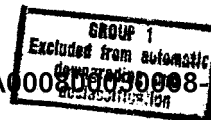

25X1

2. In setting up their budget for FY'67, we were allotted a total of [] and above. This did not include our SPS requirements. This figure also had to be reduced by two, leaving us with a total of [] and above.

3. In order to balance out the figures and leave us with a total of [] the two SPS's that we lost were assigned to us as two additional GS-15's, this then left us with a total of [] and above. In order to get down to the [] that PPB has allotted us, they in turn reduced the number of 14's that we had by a figure of four. This left us with the allotted [] This reduction of four had to be picked up elsewhere so they were assigned to the uncontrolled level of the GS-13's. Thereby picking up four additional GS-13's we returned to our total figure of [] overall in ORD.

25X1

4. We don't anticipate that there will be any trouble in meeting our average employment during the year. If we do fill our allotments prior to June 30, then we feel that we can obtain relief by working with [] and perhaps borrowing from some other Office in the Directorate.
